

## Report Conditions

Conditions change the parameters when searching a database field. Selecting the right condition will improve the generated information in the report. Below are the three sets of conditions available depending on the database field selected.

### Range Conditions

between	▼
between	
>=	
>	
<=	
<	
<>	
=	
is one of	
is none of	

<b>between</b>	The parameters for the field are between to sets of factors.
<b>&gt;=</b>	The parameters for the field are greater than or equal to these factors.
<b>&gt;</b>	The parameters for the field are greater than this factor.
<b>&lt;=</b>	The parameters for the field are less than or equal to these factors.
<b>&lt;</b>	The parameters for the field are less than this factor.
<b>&lt;&gt;</b>	The parameters for the field are not equal to this factor.
<b>=</b>	The parameters for the field are equal to this factor.
<b>is one of</b>	The parameters for the field is one of this factor.
<b>is none of</b>	The parameters for the field is none of this factor. Remember that the <b>NOT</b> operator paired with this condition will create a double negative.

### Date Conditions

between	▼
between	
>=	
>	
<=	
<	
is empty	
not empty	
year one of	
month one of	
day of month one of	
weekday one of	
day of year one of	

<b>between</b>	The parameters for the field are between to sets of factors.
<b>&gt;=</b>	The parameters for the field are greater than or equal to these factors.
<b>&gt;</b>	The parameters for the field are greater than this factor.
<b>&lt;=</b>	The parameters for the field are less than or equal to these factors.
<b>&lt;</b>	The parameters for the field are less than this factor.
<b>is empty</b>	The parameters for the field is empty of all characters
<b>not empty</b>	The parameters for the field are not empty of one or more characters.
<b>year one of</b>	The parameters for the field include the year being one of this factor.
<b>month one of</b>	The parameters for the field include the month being one of this factor.
<b>day of month one of</b>	The parameters for the field include the day of the month being one of this factor.
<b>weekday one of</b>	The parameters for the field include the day of the week being one of this factor.
<b>day of year one of</b>	The parameters for the field include the day of the year being one of this factor.
